

Important information regarding changes of EMUGE-FRANKEN AB prices for 2018!

During the last years, EMUGE-FRANKEN AB has tried to avoid a major price adjustments and has deliberately used this as a policy for the market.

The prices of standard products have remained untouched since February 2016, but for 2018 this is unfortunately no longer possible. There are several reasons that affect our decision to raise prices, but the main and most important weighing are:

- Currency increase since January 2016
- Commodity prices on cemented carbide and diamond

We at EMUGE-FRANKEN AB hope you understand this (you might experience the same situation) and rely on that our ambition is to continually help our customers reduce their total production costs for their manufacturing process. The new prices can be found in our price list on our website www.emuge-franken.se/en in the beginning of week 3 2018.

We wish all our customers a good start to the new year and look forward to continued rewarding cooperation. We will be close to you, and be a partner in your daily work and with a common target to develop your production.

With kind regards

Magnus Andersson
CEO
